
Free 60-Minute Workshops at STEMEX Norwich – Collaboration with Autism Explorers

In partnership with Autism Explorers, STEMEX Norwich is offering free 60-minute workshops designed specifically for children with Special Educational Needs (SEN), including those with autism. These workshops are aimed at fostering creativity, problem-solving, and hands-on learning in a supportive environment.

Key Details:

- Workshop Duration: 60 minutes
- Target Audience: SEN children, including those with autism, who can independently work within limited space.
- Focus: Activities are carefully structured to allow children to engage with STEM (Science, Technology, Engineering, and Mathematics) concepts while promoting focus, independence, and social interaction in a safe, sensory-friendly setting.
- Collaborative Environment: Children will work at their own pace, with individual support available to guide them through the session, ensuring they feel comfortable and confident in their learning.
- Space Considerations: Workshops are designed for a limited number of children, ensuring that each participant receives the attention they need, with activities tailored to their sensory and spatial needs.

Parent/Guardian Guidelines:

Parents or guardians will not be in the workshop space but must remain nearby in case of an emergency or to provide comfort. For example, the UFO Café is a nearby, accessible area where parents can relax while staying within reach.

STEMEX staff and Autism Explorers facilitators will oversee the workshop, ensuring that each child is supported throughout the session.
